(browser-based)

Simple web interface for volunteer initial application.

VSys Live Kiosk

(browser-based - great on mobile devices!)

Volunteer check-in and check-out, hours entry, metrics tracking, send/receive messages.

Benefits

Automation

- Eligibility/intake checklists to manage your onboarding process.
- Automatic e-mails and text messages.
- Scheduled reports w/automatic delivery.
- Reminders: assignments, trainings, expiring certifications or trainings, log hours.
- Online reference checks.
- Opportunities can automatically open and close themselves by date and status.
- Automatic awards criteria and nominations.
- Capture volunteering metrics, e.g. visitor interactions, meals delivered, trees planted.
- Thank-you's/acknowledgements.
- Bulk update operations.
- Integrations with Active Directory, Kronos & other timekeeping systems, PeopleSoft and others.
- Optional Scripted Integration Module for automated import/export with almost any other systems.
- Integrated with select background check vendors.

Support

- Phone and e-mail support.
- On-site and web-based training available.

Adaptability

- Adapts to your workflow and tasks, not the other way around.
- Bookmarking of tools, reports, etc.
- Tool profiles: re-configure the layout of VSys One to focus on your tasks, eliminate extraneous items.
- Create, modify and save reports for later use.
- User-configurable reports: reports trimmed down to bare essentials for easy use.

Hosting

Cloud-based: We can host VSys for you in our secure facilities – US or Canada. Access VSys from anywhere in the world using your PC, Mac, tablet or smartphone.

– or –

In-house: Give yourself 100% control by hosting VSys within your own facilities, and integrating it into your existing infrastructure.

Technical

- No custom programming needed.
- Powerful conversion tools.
- Two-factor authentication available.
- Active Directory integration.
- Unlimited custom fields, applications, certifications.

Is VSys PC- or browser-based?

VSys One is a Windows desktop application. If we host VSys for you, it's accessible via browser or Terminal Services from almost any machine or device. (If you self-host, your IT department controls how this is done.)

VSys Live, VSys Live Kiosk and VSys Anywhere are *always* run directly from a web browser.

What kind of support do you provide?

By phone, e-mail and web – with US-based staff who know how to use our software, know volunteering and volunteer management. Training is available on-site and via the web (WebEx), and we do free training webinars every month.

How much does it cost? I don't see it on your website...

We don't put the pricing on our website – not because we're hiding it, but because it varies based on your needs. Once we know your requirements, we'll give you a quote on the costs and the services you'll need/want. And we never charge you based on the number of volunteers you want to track: we don't want to penalize you for being successful!

How secure is my data?

Very. If you host VSys, the VSys One database sits on your server, in your IT department, under your control. No outside access is ever made to that data by us or our programs.

When we host VSys for you, we give you your own secure servers that are never shared with anyone else, hosted in a data center with state-of-the-art physical and logical security.

How can we import our existing data?

VSys can import data from a wide variety of sources. For Volunteer Works, Volgistics and Raiser's Edge users we do your conversion for you – free!

How can I learn more about VSys? Can I get an evaluation copy?

Contact us and we'll do an online demonstration for you. This is the best way to get you started and understand the features most important to you. After that we'll be happy to get you an evaluation copy for you to try VSys.
